## SUMMARY

Results-oriented Full Stack Software Developer with a history of success in diverse technical environments. Adept at seamlessly integrating managerial and technical skills, I've excelled in roles at leading tech companies and contributed significantly to open-source projects. My expertise extends to the development of Web & Desktop applications, Rest APIs, and Microservices. Known for efficiently adopting new products, platforms, and technologies, I am committed to delivering results and driven by a passion for innovation, teamwork, and continuous learning. My unique blend of experience positions me as a valuable asset, ensuring excellence in any project or team setting.

## SKILLS

**Technical Skills** Angular, Typescript, JavaScript, REST APIs, SQL, Cosmos DB, Azure Data Storage, C#, .Net Core, Azure, Git, Azure Cloud Functions, Power BI, Micro-services, MVC, Entity Framework  
**Soft Skills** Creative, Fast Learning, Problem-Solving, Teamwork, Communication, Leadership

## EXPERIENCE

**Full Stack Engineer** June 2023- current  
Systems Ltd: ([systemsLtd.com](http://systemsLtd.com)) Islamabad, PK

- Working on Supply Chain Enterprise product as a full stack developer managing the Angular based front-end and .Net core based APIs and Services along with Azure supported distributed system.
- Working on Azure Cloud Services and managing the Client specific database with Azure CosmosDB and Azure Storage and manage the transactions using Azure Functions, Azure Cloud Computing and web-jobs.
- On Platform application working with .Net API along with SQL to manage and enhance the performance of the product
- Managing the deployment on Azure Devops CI/CD pipelines
- Optimized the server-less azure functions in order to reduce cost of resource units for backend response's efficiency
- Working with Power BI and generate the report connecting with SQL tables and to find the trends and finding the targeted flaws using different data analytic techniques
- Leading a team to achieve sprint goal and making effective outcomes within provided ETAs

**Full Stack Engineer** Jan2022-June2023  
Techneivity Inc: ([techneivity.com](http://techneivity.com)) Islamabad, PK

- Worked on front-end and back-end layers of a legacy desktop application and web application using C#,JS, Angular, JQUERY, HTML and CSS.
- Managed Web APIs in .NET and lately converted them in .NET Core and worked on their optimization and performance in term of response time.
- Updated the old stack web application into Angular 16
- Programmed utilities and microservices to communicate with sensor's real time data and it's manipulation
- Worked on SQL and wrote multiple Stored Procedures to optimize and enhance database performance
- Worked on logs configuration and achieved huge cost reduction in S3 storage bills

**Web Developer** Jan2020-Jan2022  
Freelancer: Islamabad, PK

- Worked on open source web development projects
- Worked on on-going front-end projects in Angular, JavaScript and C#
- Worked on different programming problems and resolved configurations & integration issues

## PROJECTS

---

### Blogging Website

Angular JavaScript HTML CSS

Developed an blogging website in Angular where everyone can read blogs of various field and post their own blogs as well so people can get benefits

### Online Buying Website

Angular Typescript HTML CSS

Developed an angular application for ordering items online. Made it using typescript and features of angular like dynamic routing, AG Grid, Reactive Forms and data exchange services

### Database Migration Utility Service

.NET Core SQL Server

Developed an .NET Core based console application which will take connection string of one SQL Database and migrate all of it's data like tables, functions, key constraints, stored procedures and whole schema to other DB

### API Migration to latest version

.NET Core MVC

Migrated the whole old version .NET API to .NET Core and updated all the custom packages and dependency injections to enhance the performance and make the architecture more scalable

## EDUCATION

---

Bachelor of Computer Science, FAST NUCES University (<https://nu.edu.pk/>)

2017-2022

## HONOURS AND AWARDS

---

**Coding Badges:** Earned coding badges for Hacker Rank

**Teaching Assistant:** FAST NUCES University,

Selected as TA and certified for outstanding performance in the Object Oriented Programming and Linear Algebra courses and evaluated students assignments and resolved queries in projects

**Lead Coding Competition:** Organized and lead coding competition held in our university

**Table Tennis Tournament Winner:** FAST NUCES University

Won the Table Tennis tournament that happened at my university.

## LANGUAGES

---

English, Urdu

## HOBBIES AND INTEREST

---

**Hobbies** Read tech blogs, Coding, Hiking, Table Tennis, Cricket, Social Work

**Interest** Artificial Intelligence, Computer Science, Enhancing my Technical Skill set, Team Building
